

The RN can see you *EARLIER!*

Did you know that at CRMC RNs must have advanced education and advanced practice skills? This means that Nurses at our clinic have a minimum of a Master in Family Medicine or Master in Nursing and are allowed to prescribe schedule 1 medications!

If your condition is urgent and acute, and your Primary Care Provider is fully booked for today or tomorrow, you may see our Registered Nurse and receive the same treatment you would receive from your Physician or Nurse Practitioner.

Ask one of our Medical Office Assistants at the front desk for further information!
